the right chemistry

**A**t IBC we love the spark of new ideas and creating the right chemistry for our clients. Our technical experts combine the best elements of knowledge, experience, products and customer support to invent or create successful construction solutions.

**Covering all the angles**

IBC is at the cutting edge of construction techniques. You know best the issues affecting your work, so we work with you to discover your precise requirements. Together, we develop targeted, innovative approaches to make that breakthrough.

**We don't put round pegs in square holes**

With IBC, you get a tailor-made solution. We use our knowledge, experience and international reach to promote solutions, not products. Through our international supply network, you can benefit from entire product ranges and global R&D capabilities.

**Speaking your language**

Our people skills are just as impressive as our technical know-how. With over 30 years of experience, and national coverage, we guarantee an excellent customer service relationship.

**IBC, the right chemistry**

Combining the best mix of products, knowledge, experience and customer support.

# Bright Sparks!

**IBC is the leading, Irish-owned manufacturer and distributor of construction chemicals.**

## Flooring Systems

- High early strength
- Low-shrinkage
- Fast-setting
- Trafficable

Using "the right chemistry", IBC have succeeded in producing a range of unique, low-shrinkage, high early strength, fast-setting, trafficable, cement based floor screeds.

All our screeds are pre-blended, polymer modified, pumpable, and are designed to meet the high standard requirements of the construction industry. If your requirements are for a high quality floor finish on a domestic, commercial, under-floor heating or industrial project, IBC have it covered.

## Domestic & Commercial Range

### Cemdure Range

Rapidly drying levelling mortar for house-building.

### Cemfort Range

A very rapidly drying levelling mortar for house-building and utility construction.

## Coloured Flooring

### Cemstyle Range

A decorative self-levelling floor screed available in a range of various colours for domestic, commercial & industrial applications.

Industrial  
Commercial  
Domestic

## Industrial range

### Cemtop Range

The Cemtop product range has been specially designed to suit specific application requirements ranging from:

- Pumpable base layers for industrial floors
- Pumpable fibre reinforced screed for use with underfloor heating systems and/or wooden foundations.
- Pumpable screed for industrial use
- Pumpable floor screed for heavy forklift traffic
- Pumpable high strength screed suitable for internal & external use

## Polyurethane & Epoxy based coatings

We offer the following high quality Polyurethane & Epoxy based coatings:

### Maxurethane

A one-component polyurethane-based coating which is highly resistant to chemical attack.

### Maxurethane Top

A high chemical resistant, one-component polyurethane-based coating suitable for internal & external use.

### Maxfloor

A two-component water-based epoxy coating available in matte or gloss finish.

### Maxepox 800

A high chemical resistant, epoxy based coating approved for use in the food industry.

### Cempur

A water thinnable colourless and environmentally friendly PU-resin. Cempur protects the surface against penetrating dirt. Can be applied rapidly and easily.

### Cempur 2K

A two-component water-based epoxy coating suitable for exterior use.

## Coloured Coatings

### Cempox & Cempox Colour

Cempox is a two-component water-based epoxy matte finish coating. Cempox colour produces a silky gloss finish and is available in a range of colours.

## Our Partners

**Cemart** is a company specialising in patching mortar and self-levelling floor mortar. Their expertise is based on more than 20 years of experience in floor manufacturing and floor placing techniques.

Established in 1977, **DRIZORO** supplies specialty mortars and systems designed for flooring and decorative finishes. DRIZORO's Headquarters, Production and R&D facilities are based in Madrid, Spain, and from there, the international division provides technical assistance to customers in more than thirty countries worldwide.

We have segmented our full product offering into the product groups shown below. Should your particular requirements not be included here, please call us on +353 (0) 1 832 10 05, or email your inquiry to sales@ibcltd.net

## Structural Waterproofing:

- Sodium Bentonite
- Bituminous
- Cementitious
- Polyurethane
- Re-Injectable Hose Systems

## Concrete Repair:

- Epoxy, Cementitious, Polymer Modified and Polyester Structural Repair Mortars.
- Adhesive / Bonding Agents
- Carbon Fibre Structural Strengthening System
- Fairing/Levelling Mortars
- Carbon Protection Coatings
- Corrosion Inhibitors

## Flooring:

- Epoxy, Polymer Modified, and Cementitious Screeds.
- Fast-track Flooring Systems
- Epoxy Coatings
- Acrylic Coatings
- Polyurethane Coatings
- Dry-Shakes
- Fast Track Floor Repair Products
- Temporary Protective Peelable Coatings
- Shrink Compensated Grouts

## Plastering and Rendering:

- Liquid Waterproofers
- uPVC Beading
- Reinforcement Mesh
- Bonders and Sealers
- Fairing Coats
- Water Repellents

## Damproofing and Remedial:

- Injection Systems
- Drainage Membranes
- Waterproof Coatings
- Water Repellents

## Universal:

- Mortar and Concrete Admixtures
- Wood Preservatives
- Sealants and Adhesives
- Protective Peelable Coatings
- Surface Coatings and Sealers
- Colour Pigments
