

the right chemistry

We have segmented our full product offering into the product groups shown below. Should your particular requirements not be included here, please call us on +353 (0) 1 832 10 05, or email your inquiry to sales@ibcltd.net

Structural Waterproofing:

- Sodium Bentonite
- Bituminous
- Cementitious
- Polyurethane
- Re-Injectable Hose Systems

Concrete Repair:

- Epoxy, Cementitious, Polymer Modified and Polyester Structural Repair Mortars.
- Adhesive / Bonding Agents
- Carbon Fibre Structural Strengthening System
- Fairing/Levelling Mortars
- Carbon Protection Coatings
- Corrosion Inhibitors

Flooring:

- Epoxy, Polymer Modified, and Cementitious Screeds.
- Fast-track Flooring Systems
- Epoxy Coatings
- Acrylic Coatings
- Polyurethane Coatings
- Dry-Shakes
- Fast Track Floor Repair Products
- Temporary Protective Peelable Coatings
- Shrink Compensated Grouts

Plastering and Rendering:

- Liquid Waterproofers
- uPVC Beading
- Reinforcement Mesh
- Bonders and Sealers
- Fairing Coats
- Water Repellents

Damproofing and Remedial:

- Injection Systems
- Drainage Membranes
- Waterproof Coatings
- Water Repellents

Universal:

- Mortar and Concrete Admixtures
- Wood Preservatives
- Sealants and Adhesives
- Protective Peelable Coatings
- Surface Coatings and Sealers
- Colour Pigments

Structural Repair Systems

IBC Concrete Repair

the right chemistry

the right chemistry

At IBC we love the spark of new ideas and creating the right chemistry for our clients. Our technical experts combine the best elements of knowledge, experience, products and customer support to invent or create successful construction solutions.

Covering all the angles

IBC is at the cutting edge of construction techniques. You know best the issues affecting your work, so we work with you to discover your precise requirements. Together, we develop targeted, innovative approaches to make that breakthrough.

We don't put round pegs in square holes

With IBC, you get a tailor-made solution. We use our knowledge, experience and international reach to promote solutions, not products. Through our international supply network, you can benefit from entire product ranges and global R&D capabilities.

Speaking your language

Our people skills are just as impressive as our technical know-how. With over 30 years of experience, and national coverage, we guarantee an excellent customer service relationship.

IBC, the right chemistry

Combining the best mix of products, knowledge, experience and customer support.

Bright Sparks!

IBC is the leading, Irish-owned manufacturer and distributor of construction chemicals.

Structural Repair Systems

For the past 30 years, IBC have consistently provided high quality concrete repair solutions. We offer full specification and technical support to engineers, contractors and clients alike.

Anti-carbonation coatings

Maxseal Flex: A two-component, flexible, waterproof coating for the protection of concrete against carbonation.

Bonding agents

Maxcryl: An acrylic based product for use as an additive in portland cement mortars & concrete to increase adhesion and chemical properties.

Maxepox bond-W: A two component, epoxy adhesive, designed for the bonding of construction materials when the humidity in the substrate is high.

I-Bond SBR: A styrene-butadiene co-polymer latex specially designed for use with cementitious mixes.

Chemical anchors

A range of a polyester & epoxy chemical anchors available in both cartridge & pouring grade.

the right chemistry

the right chemistry

Concrete repair mortars - Cementitious

Our range includes the following;

Maxrite: A fast setting polymer modified cementitious mortar, designed for structural repair of new or old concrete. Spalled and broken concrete can be restored to its original condition without the use of form-work. Maxrite is approved for use with potable water reservoirs. (BS 6920)

Maxrite 500: A single component, cementitious, microsilica, polymer-modified, fibre-reinforced structural repair mortar with corrosion inhibitors. It is specially designed for high performance.

Maxrite 700: A normal setting, single component, cementitious, polymer modified, fibre-reinforced structural repair mortar with corrosion inhibitors.

Maxrest: A one-component fast setting non-shrink structural repair mortar for concrete and mortar. Spalled and broken concrete can be restored to its original condition without the use of form-work.

Maxplug: Maxplug is a quick-setting, non-shrink, high compressive strength, cement based mortar that instantly stops running water. Maxplug sets under water & is approved for use with drinking water. (BS 6920)

Concreseal-5: A polymer-modified cementitious single component mortar, specially designed for superficial cosmetic repair and levelling of renders and concrete surfaces in very thin layers up to a thickness of 5mm.

Corrosion inhibitors

Maxrest Passive: A one-component, ready to use liquid for the protection of re-inforcing steel bars against corrosion.

Maxrite Passive: Is a one-component, cement-based primer with corrosion inhibitors.

Epoxy bonding & repair mortars

A range of both two and three component epoxy bonding adhesives. For bonding of metal plates to concrete or construction elements to each other.

Structural Strengthening

Drizoro Wrap: A carbon-fibre sheet for the repair & strengthening of structural concrete.

Our Partner

Established in 1977, DRIZORO supplies specialty mortars and systems designed for flooring and decorative finishes. DRIZORO's Headquarters, Production and R&D facilities are based in Madrid, Spain, and from there, the international division provides technical assistance to customers in more than thirty countries worldwide.
