

PROTECTAPEEL

A spray applied, peelable protection system for non-porous substrates

Protectapeel is a water borne protective coating that provides a very durable, tough and UV resistant protection for a multitude of non-porous surfaces such as windows (aluminium & PVCu) and signage.

The main benefits of the system...

- Quick and exact spray application
(protect a 1.2m x 1.8m window in under 1 minute)
- Very durable & tough
Protects substrates from the damaging effects of UV rays
- Serves a multitude of application areas
(protects signage, windows and other surfaces from damage during construction)
- Does not become brittle
- Does not bond permanently to surfaces
...even after months of exposure to the elements
- The coating is not affected by wind or rain
It stay's where it's supposed to be!
- Easy to peel off when needed
